

SilverScreen Roller Blinds

Energy Saving Blinds for Green Buildings

- SilverScreen is not a cost it's an investment
- During summer, SilverScreen's highly reflective metallised surface repels up to 85% of solar energy before it has a chance to turn into heat. This means room temperatures stay lower, saving you on cooling costs.
- In winter, the low E aluminium layer insulates the window, trapping warm air in the room, saving you on heating costs.
- SilverScreen can save approximately 20% of energy consumption in an air-conditioned building and about 10% in a non-air-conditioned building.

Highest Level of Visual Quality

Visual comfort through light control, glare control & view through.

Highest Level of Thermal Quality

Temperature control – ambient temperature, radiant heat reduction, insulative properties.

Significant Energy Savings

Reduction in CO2 emissions & reduction in capital costs for cooling and glazing.

Healthy Environment

Excellent colour rendering index. Fabric is anti-bacterial, anti-static & very low VOC emission.

Safe Environment

Fabrics provide daytime privacy, are flame retardant & carry Oeko-Tex Standard 100 certification.

Five Year Warranty

Get reassurance with our 5 year warranty guaranteed.
